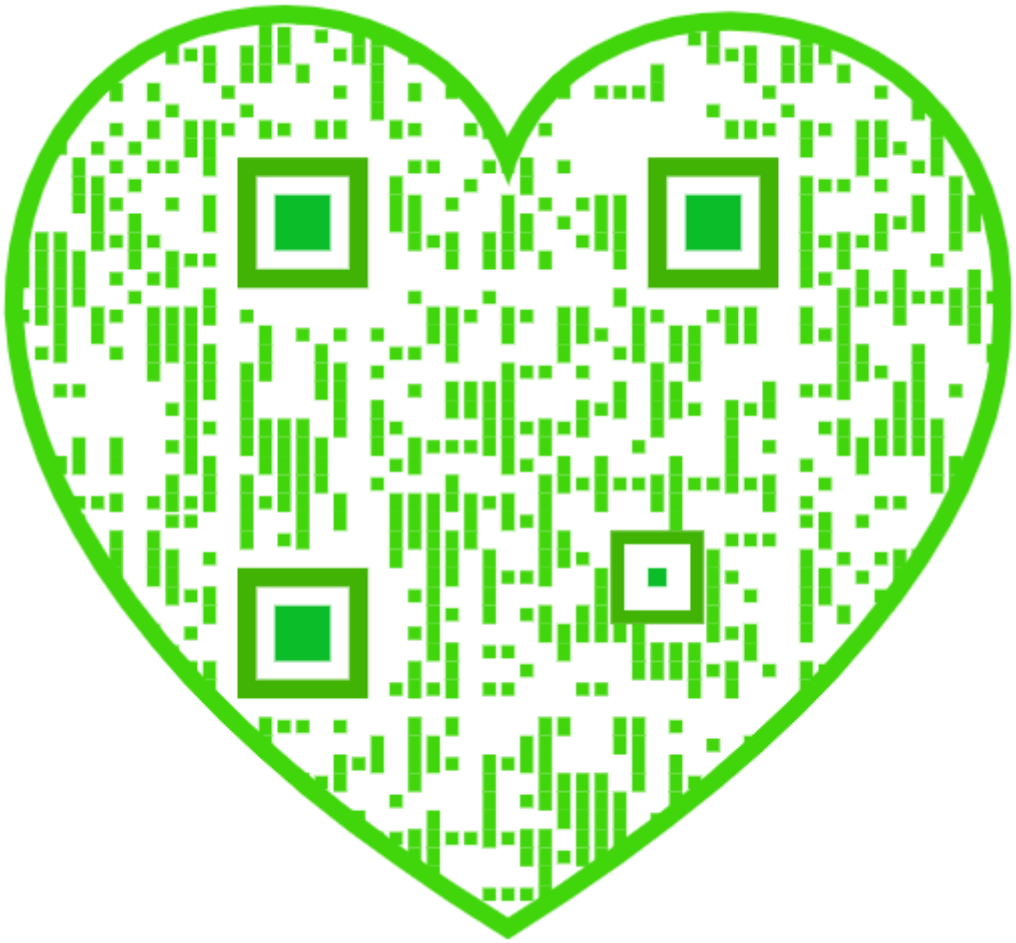
PERFECTION

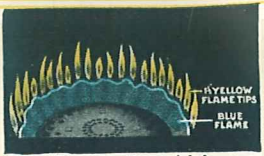
Oil Stoves and Ovens



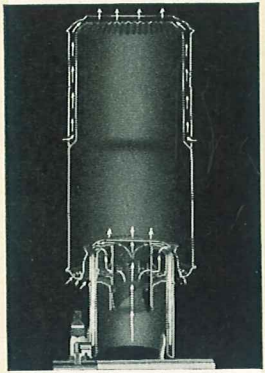
Why PERFECTION Oil Cook Stoves are Preferred by Housewives Everywhere

MORE THAN 4,500,000 Perfection Oil Cook Stoves now in use are evidence of their world-wide popularity. Wherever the old methods of cooking with wood or coal for fuel have given way to modern methods, Perfection Oil Cook Stoves will be found giving clean, odorless and dependable service, with cooking satisfaction that is equal to that of gas. Perfection's world leadership is a matter of 37 years of continuous production of oil stoves of outstanding convenience and dependability.

"Perfection stoves ideally fulfill every cooking requirement," is the verdict of America's most famous cooks, including Mrs. Sarah Tyson Rorer, Miss Rosa Michaelis, Miss Lucy G. Allen, Mrs. Belle DeGraf, Miss Margaret Allen Hall and Mrs. Kate B. Vaughn.



The famous cotton wick burner of the Perfection assures a flame that remains steady wherever set. The high, yellow-tipped flame is best for fast cooking; the low blue flame for slow simmering.



Correct draft is of the utmost importance in perfect combustion of kerosene. The Perfection long-chimney burner is scientifically designed to admit just the right amount of air, with ample space to hold it until combustion is complete. No flame, but a powerful column of clean, intense heat strikes the cooking utensils which never become soiled with smoke or soot.

The Perfection is in the Long Chimney

PERFECTION Oil Cook Stoves in the new beautiful gray finish add a cheerful tone to any kitchen. They harmonize in a pleasing way with the light colored kitchen decorations that are now so popular. Shown here are the latest additions to the Perfection line—4-burner and 3-burner complete outfits with gray *porcelain enameled* top, attractive satin black finish with gray trim, white enameled cabinets and Perfection "Live Heat" Ovens with white enameled door frames.

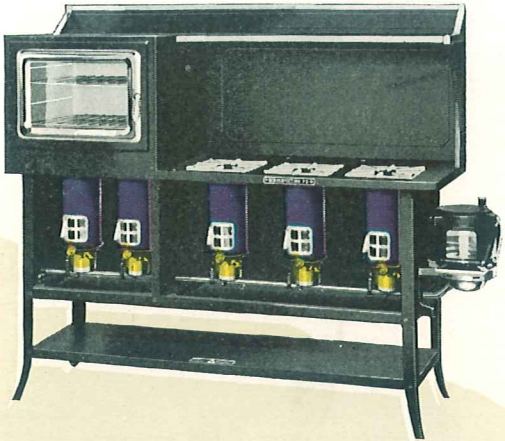
The New 1927 Stoves in Attractive Colors

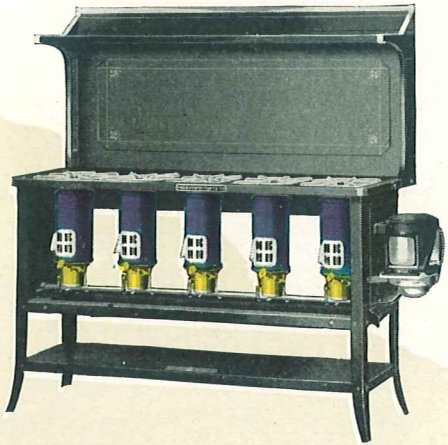
The Famous Perfection

GENUINE cooking satisfaction has been brought to millions of housewives by Perfection stoves with the famous "Cobalt" blue chimney burners. The latest models, shown here, are of attractive straight line construction. The cooking top is high and roomy and has square open grates.



Model 79 Oven Range
A splendid new range. Built-in oven of the durable and efficient Perfection "Live Heat" type. Finished in the attractive new satin black with nickeled trimmings. Length, 63¾ inches.

Only Perfection stoves have the handy glass reversible reservoirs. Oil level always visible. Easily removed and replaced while burners are operating.

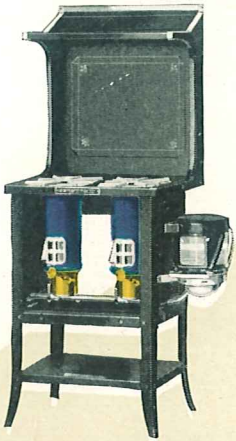


Model 75, with Cabinet
An excellent stove for the large family. Ample capacity for the big harvest-time meals. Shown here with cabinet No. 75 in satin black, nickel trimmed. Length, 64 inches.

with "Cobalt" Blue Chimney

Space for extra pots and pans on convenient base shelf. The stoves may be had with or without warming cabinets, which are made in two styles—white porcelain enameled and satin black—and have a handy top shelf. With many exclusive Perfection features, these stoves, moderately priced, offer values that cannot be duplicated in any other stove.

Model 73, with Cabinet
For the small family. Shown here with white porcelain enameled (No. 73 E) cabinet — can be had with satin black (No. 73) cabinet. Length, 42¾ inches.



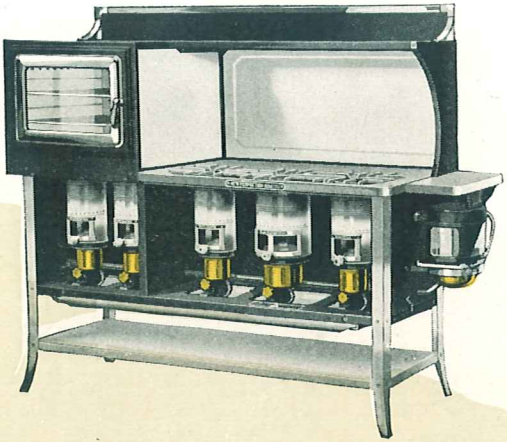
Model 72, with Cabinet
An excellent small stove. Ideal for light housekeeping or the summer cottage. The warming cabinet (No. 72) is finished in the new satin black, nickel trimmed. Length, 32⅛ inches.

Model 74, with Cabinet
A stove that will handle the cooking for the average family in a very satisfactory way. Shown here with white porcelain enameled cabinet (No. 74 E) — can be had also with satin black (No. 74) cabinet. Length, 53⅝ inches.

For Best Results
Use Perfection "Live Heat" Ovens
(See Pages 12 and 13)

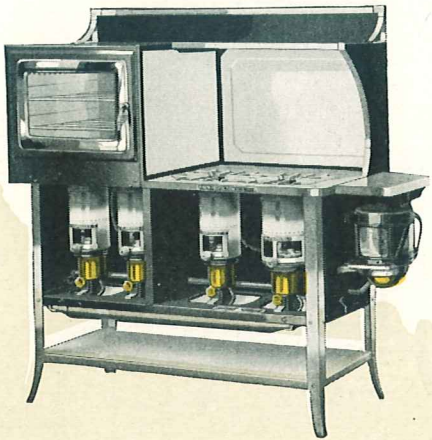
Perfection Superfex

THE world's finest and fastest oil cook stoves with double-wall Superfex burners. Each model has one "big giant" burner, equal in cooking heat and satisfaction to a giant gas burner, and one or more "little giant" burners, equal to the standard gas burners. Finished in beautiful two-tone gray. High, roomy, gray



Model 309 Oven Range

The finest of all Perfections. Combines a five-burner stove, heat-retaining built-in oven and warming cabinet into an attractive, compact, yet roomy, complete cooking range. Length, 66¼ inches.



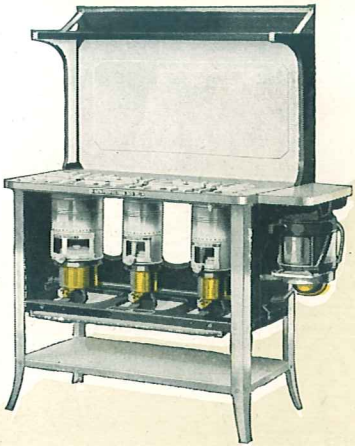
Tilting chimney makes lighting easy. The Superfex burner has an automatic wick stop—cannot be turned too high.

Model 307 Oven Range

Another super-range, similar to Model 309, but having one less burner. In both ranges the oven burners are easily made available for grate surface cooking—an exclusive advantage. Length, 55⅝ in.

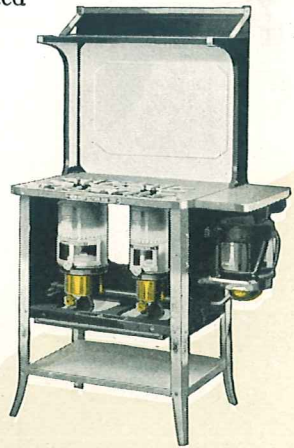
Stoves and Ranges

porcelain enameled cooking top and shelf over reservoir; legs and burner chimneys in two-tone gray; gray porcelain enameled tray under solid brass burners. White enameled cabinets optional. Chimneys tilt on hinge, easier to light, clean and rewick; automatic wick stop; patented wick cleaner.



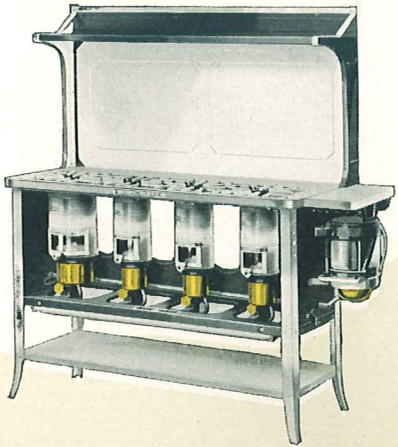
Model 303, with Cabinet

The small family will thoroughly enjoy the dependable service of this three-burner model. Compact, beautiful and convenient. With or without white enameled cabinet. Length, 46¾ inches.



Model 302, with Cabinet

Ideal for apartment or summer cottage where convenience, comfort and cooking and baking speed are appreciated. May be had with or without white enameled cabinet shown here. Length, 36⅛ in.



Model 304, with Cabinet

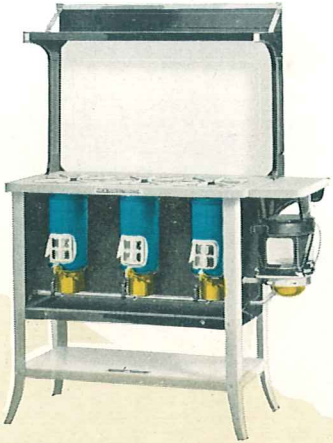
A splendid four-burner stove for year around use of the average family. Will take care of an exceptional amount of cooking. Shown here with white enameled cabinet. Length, 57⅜ inches.

See pages 12 and 13 for suitable ovens for all stoves

Use Superfex Perfections for Superior Performance

Double Wall "Turquoise"

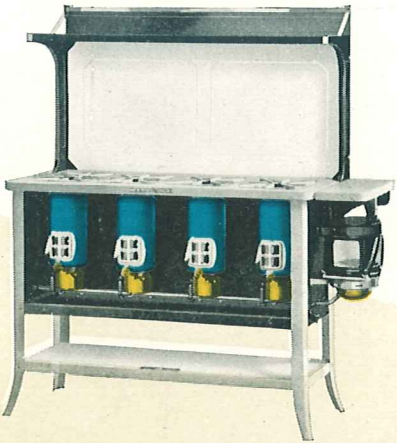
FOR those desiring an exceptionally high quality stove at a moderate price, the Perfections with the double-wall, double-draft "Turquoise" blue chimneys are recommended. They occupy a position midway between the Perfection Superfex and the famous "Cobalt" Blue

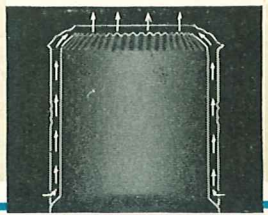


Model 233, with Cabinet

Gray **porcelain enameled** top, satin black and gray trim. Shown here with white enameled cabinet. Use No. 142 GE white trimmed oven (see pages 3 and 12); this makes an ideal complete outfit for the small family. Length, 42¾ inches.

The NEW 1927 Stoves in Color





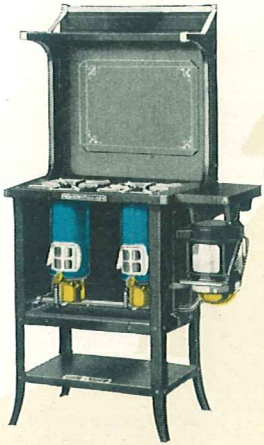
The double wall chimney prevents loss of heat through the wall of the chimney. It increases the burner efficiency and temperature at top of chimney, making a hotter and faster-cooking burner.

Model 234, with Cabinet

A beautiful and efficient stove in the popular new gray finish. Gray **porcelain enameled** top, satin black and gray trim, white enameled cabinet. Use No. 242 GE white trimmed oven (see pages 3 and 12). Length, 53⅜ inches.

Blue Chimney Perfections

Chimney stoves. Double-wall chimneys provide increased cooking heat, greater operating economy, less radiation. Solid backs add strength and prevent drafts from affecting burners. End shelf over glass reversible reservoir; solid brass burners. Cabinets optional.

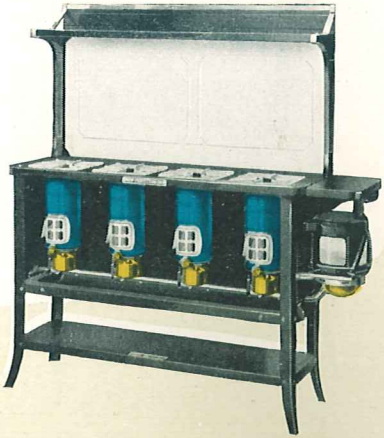


Model 132, with Cabinet

A handy size for the small apartment or summer cottage. May be had with or without the satin black cabinet shown here. Length 32⅛ inches.

Model 133, with Cabinet

A popular size in the new satin black finish. One burner can be used for the oven while the other two are used for cooking. The cabinet shown here is white porcelain enameled, available also in satin black. Length, 42¾ in.



Model 134, with Cabinet

This model differs from No. 234 only in color and finish, which is the new satin black. The cabinet is white porcelain enameled; available also in satin black. Length, 53⅜ in.

See pages 12 and 13 for suitable ovens for all stoves

Perfection Stoves Are Tested and Approved

Good Housekeeping Institute

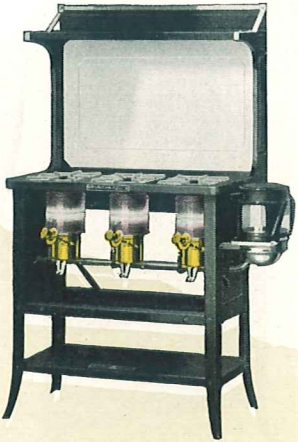
PURITAN – The Better

YEARS of efficient performance have proved the merit of the Puritan. Because of its all-around satisfaction and its remarkable durability, it has become known as "The better short drum stove." The Puritan burner generates a clean, hot flame that plays directly on the bottom of the cooking utensils. The wick tube is made of brass — rust and corrosion proof. Automatic wick stop insures

Model 42, with Cabinet

Very desirable for the small apartment or for light housekeeping. A splendid stove also for summer cottages and camps. The cabinet shown here is optional, in satin black finish only. Length, 32⅛ inches.

See pages 12 and 13 for suitable ovens for all stoves



Model 43, with Cabinet

The most popular of the Puritan stoves. Will easily handle the entire cooking requirements of the small family. The cabinet shown here is white porcelain enameled; also available in satin black finish. Length, 42¾ inches.

Model 44, with Cabinet

A favorite model for the farm. Cabinet shown is white porcelain enameled; made also in satin black finish. Length, 53⅝ inches.

Use only genuine Perfection Wicks

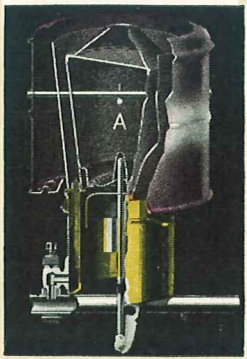
Short Drum Stove –

perfect flame control and prevents turning the wick too high. The stoves are finished in the new, attractive satin black. May be had with or without convenient warming cabinets with top shelf.

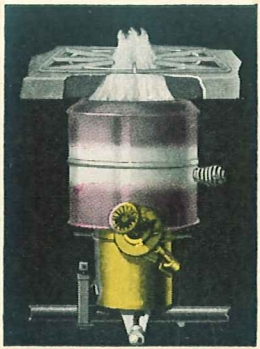
Life Guarantee

The Puritan is built for lasting service. The inner combustion tube, the vital part of a short drum stove, is *guaranteed for the life of the stove.*

The Puritan Brass Wick Tube is equipped with a removable screw top. This improvement makes it easy to reach the wick for cleaning and rewicking.



The vital part of all short drum burners is the inner combustion tube. In the ordinary stove of this type this part usually breaks down first. The Puritan, however, carries a written guarantee that its inner combustion tube will last as long as the stove.



The Puritan burner in operation. Clean, hot flame coming up through the grate. Automatic wick stop, on hand wheel, prevents turning the flame too high.

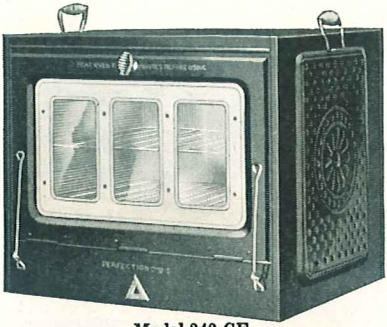
Giant Puritan Burner

A new, speedier Giant Burner, for any Puritan stove. It gives 50% more heat. Special inner combustion tube of "Enduro" heat-resisting metal, guaranteed to last as long as the stove. Furnished on order only.

Attractive, Convenient Fast

PERFECTION

SPLENDID baking and roasting qualities have proved to many pleased users that Perfection "Live Heat" Ovens give the best results through years of satisfactory service. The special air-circu-

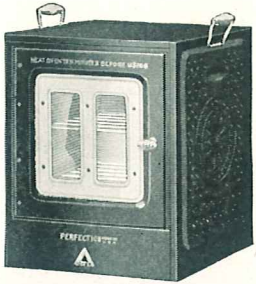


Model 242 GE

Two-burner, extra large; glass drop door; white enameled door frame. Inside dimensions: Length 18¾ in., depth 15¾ in., height 16⅞ in.

Model 141 G

One burner, glass drop door. Inside dimensions: Length 11½ in., depth 11¾ in., height 16⅞ in.



Model 121 GE

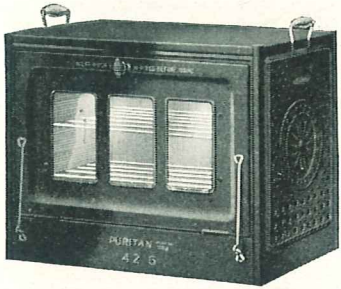
Model 142 GE

Two-burner, white enameled door frame. Inside dimensions: Length 18¾ in., depth 11¾ in., height 16⅞ in.

Perfection Oven Heat Indicator

Takes the "guess work" out of baking and roasting. Easily fitted to almost any glass oven door.

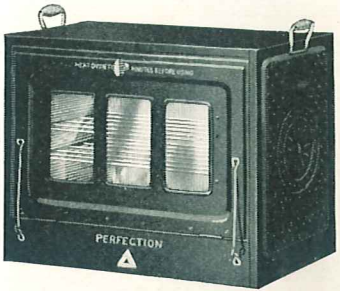


Model 42 G Puritan

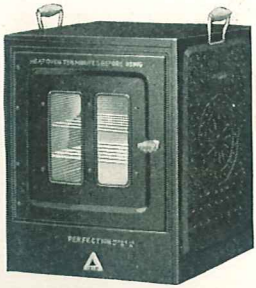
Two-burner, drop door. Inside dimensions: Length 18¾ in., depth 11¾ in., height 16⅞ in.

"Live Heat" OVENS

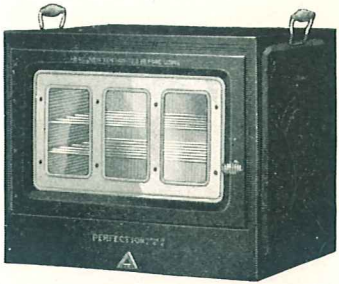
lating system assures uniform heat and carries off excess moisture and odors, making it entirely practical to bake cake and highly flavored foods, such as fish and onions, without having flavors mixed.



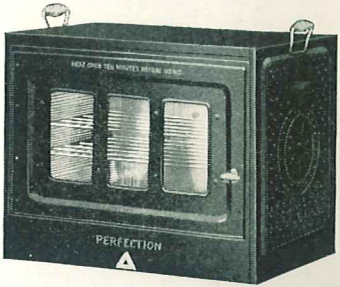
Model 142 G
Two-burner, drop door. Inside dimensions: Length 18¾ in., depth 11¾ in., height 16⅞ in.



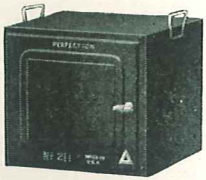
Model 121 G
One-burner, swing door. Inside dimensions: Length 11½ in., depth 11¾ in., height 16⅞ in.



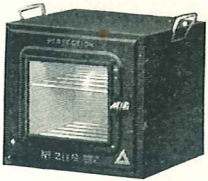
Model 122 GE
Two-burner, white enameled door frame. Inside dimensions: Length 18¾ in., depth 11¾ in., height 16⅞ in.



Model 122 G
Two-burner, swing door. Inside dimensions: Length 18¾ in., depth 11¾ in., height 16⅞ in.



Model 211



Model 211 G

Shown here are two Perfection "Junior" Ovens — just the right size for two pies or a pan of biscuits. A real convenience for camping parties or the summer home. Inside dimensions: Length 10⅞ in., depth 10¼ in., height 10½ in.

The best portable ovens for either gas or oil stoves

JUNIOR STOVES • TOASTER • BROILER

Model 61 B

For the camp or yacht and wherever a light and compact stove is needed, the Junior Perfections are ideal. They cook with all the satisfaction of the regular "Cobalt" Blue Chimney models. Dimensions—Model 61 B: Diameter of top 12 in. Height 16¾ in., weight 8 lbs. Model 62 B: Length 22¼ in., height 16½ in., weight 17½ lbs.

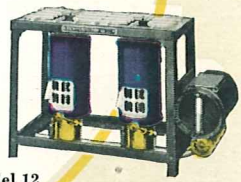
Model 11

The one-burner stove shown above stands solidly on circular base. Steel shield forms body and protects the burner from wind. Diameter 11¼ in., height 16¼ in., weight 9¾ lbs. The two-burner stove (below) is especially suited for the farm, laundry, creamery, lunch-wagon, etc. Length 27¼ in., depth 11½ in., height 16⅝ in., weight 19½ lbs.

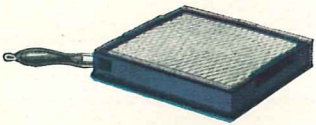
Model 62 B

Yacht Stoves

For use on yachts and boats of all kinds, Models 81 B and 82 B (similar to Models 61 B and 62 B) have holes in legs for fastening to deck, and rails around top to keep cooking utensils from sliding off. Special yacht sleeves hold chimneys in place.



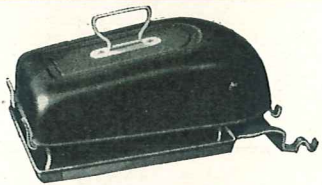
Model 12



Perfection Toaster

Delicious, crisp, brown toast — four slices at a time—toasted evenly by the Perfection Toaster. Keeps crumbs out of the burners.

The many uses for the Perfection Broiler and the Perfection Toaster make them a real necessity. The Broiler can be used also for baking muffins, beans, potatoes, apples or a small pie. The Toaster is splendid for heating rolls quickly as well as an ideal toaster for either oil or gas stoves.



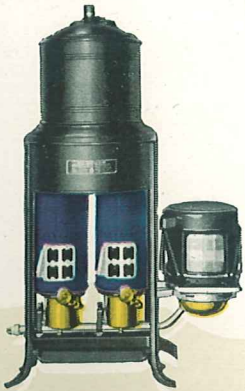
Perfection Broiler

Broils steaks, chops, etc., perfectly, without turning. Meat rests on wire rack and heat from burner strikes all parts at the same time.

KEROSENE WATER HEATERS & ROOM HEATERS

Hot Water for Homes Without Gas

With a Perfection kerosene-burning Water Heater an abundant supply of steaming hot water is always available for kitchen, bath or laundry.



PERFECTION OIL HEATERS

Chase Chills from Cold Corners

Seven beautiful models, including several in attractive colors and nickel trimmings, to harmonize with the decorations of any room.

Model 431 Water Heater (above) combines heater and 30-gallon "Stay Hot" storage tank with convenience of thermostatic shut-off in one complete unit.

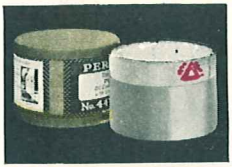
No. 412 Water Heater (above) is without an equal in the popular priced field. Cast iron heating units with special heat-collecting fins; double wall, double-draft long chimney burners. For use with standard 30-gallon tank.

Plenty of hot water for shaving, in 5 minutes; for dish washing, in 10 minutes; for a bath, in 30 minutes; and all that is needed for many other uses — these are possibilities that become actualities with the use of a Perfection Kerosene-Burning Water Heater which gives satisfaction, dependability and operating economy equal to the gas water heater. Four models. Can be hooked up to your kitchen force pump if you have no running water system.

Model 1630 (Illustrated) — Blue enameled upper and lower drums. Nickeled trimmings, lead-coated reservoir. Height (bail down), 24⅛ in. Weight, 12¾ lbs.

The Perfection Oil Heater carries cheerful warmth wherever needed. Easily carried anywhere at any time—in nursery, living-room, bathroom or laundry, in office, workshop or store—it is always handy and dependable. Ten hours of clean, odorless heat from a gallon of kerosene.

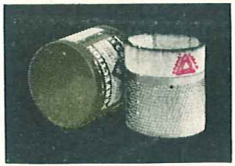
Use Only Genuine Perfection Wicks



No. 441—Wick with carrier and carton—for Giant Superfex Burner only.

INSIST UPON genuine Perfection wicks, stamped with a red triangle trade mark for your Perfection stove. Accept no substitute. No other wick will give complete satisfaction. Perfection wicks are fixed to metal carriers and are trimmed, burned and ready to light. With proper care they will last for many months.

A red triangle trade mark is stamped on each genuine Perfection wick. Use no other.



No. 331—Wick with carrier and carton—for Standard Superfex, Blue Chimney, and Puritan models.

Perfection Wick Cleaner

Perfection Wick Cleaner (Left)

Cleans the wick to the correct bevel, or chisel edge, for perfect operation. For all Perfection Blue Chimney Burners.

Wick Changes Easy (Right)

Replacing old wicks with new ones is simple. Perfection burners are so constructed that the wicks slide in and out easily. One minute is ample time to make the change.

Wicks Easily Replaced
